person(s) authorized by him of personal water craft and other similar powered craft as well as windsurfers, dinghies, catamarans or other water-sports equipment carried by the Vessel. The insurance shall also cover War and Strikes and include insurance of Crew against injuries and/or Third Party liabilities incurred during the course of their employment. The CHARTERER shall be entitled to the benefit of the OWNER's insurances.

4.2. All such insurances shall be on such terms and subject to such excess (deductible) as are customary for a Vessel of this size and type. Copies of all relevant insurance documentation shall be available for inspection by the CHARTERER prior to the Charter on reasonable notice to the OWNER, and shall be carried on board the Vessel.

4.3. Under normal circumstances the CHARTERER shall only be liable for such costs or losses as may be incurred repairing damage caused by the CHARTERER or his guests (intentionally or otherwise) to the Vessel or any third party up to the level of the Excess (Deductible) on the OWNER's insurance policy for each separate accident or occurrence. However, in any event, the CHARTERER's liability shall not exceed an excess (deductible) the equivalent of one percent (1%) of the total sum insured.

4.4. The CHARTERER may be liable for a sum greater than the Excess (Deductible) on any one accident or occurrence if the CHARTERER or any of his guests acted in such a manner (intentionally or otherwise) as to void, or limit, the cover under the OWNER's insurance.

Product: RUSSIAN AVIATION KEROSENE JET FUEL TS-1 GOST 10227-86
Passport №: RUS-50030.18.TS-1
Quality: Russian standard Export
Quantity: Product quality sample
Origin: Russian Federation
Date of issue: 12 September, 2018
Place of Issue: Novorossiysk Commercial Sea Port ("NCSP"), Russia
Company of Certification: OJSC «Rosneft-Yuganskneftegaz» / Quality Assessment Department

Specification details:

Indicators	TS-1	RT
Density at 20oC, kg/m3, not less	780	775
Fractional composition		
Temperature of distillation, oC		
Below	-	135
Not above	150	155
10% distilled at temperature, oC not above	165	175
50% distilled at temperature, oC not above	195	225
90% distilled at temperature, oC not above	230	270
loss from distillation, % not more	1.5	1.5

Kinematic viscosity, mm ² /s (cSt)		
At temperature		
20oC, not less	1.30 (1.30)	1.25 (1.25)
At minus 40oC, not more		
At minus 20oC mm ² /s, no more	8	8
Lower heating value, Kj/kg, not less	43120	43120
Acidity, mg KOH per 100cm ³ fuel within	-	0.2-0.7
Iodine value, g iodine per 100g of fuel, not more	2.5	0.5
Flash point in closed crucible, oC, not below	28	28
The onset of crystallization temperature, oC, not above	60	55
Thermal oxidative stability under static conditions at 150oC, not more than		
*Excluded, CH. No.2		
*The concentration of soluble resins, mg per 100cm ³ fuel	-	30
*The concentration of insoluble resins, mg per 100cm ³ fuel	-	3
*The thermal stability under static conditions at 150oC, not more than		
Volume (mass) fraction of aromatic hydrocarbons, % nor more	20(22)	20(22)
Concentration of actual pitches, mg per 100cm ³ fuel. Not more	3	4
Mass fraction of Sulphur, % not more	0.20	0.10
Mass fraction of mercaptan sulfur, % not more	0.003	0.003
Mass fraction of hydrogen sulfide	No	
Test copper plate at 100oC for 3h	Withstands	
Ash content, % not more	0.003	0.003
The content of water-soluble acids and alkalis	No	
The content of Soaps of naphthenic acids	No	-
Content of mechanical impurities and water	No	
Mass fraction of naphthalene hydrocarbons, % not more	-	1.5
Luminometric number, not below	-	50
Thermal oxidative stability, as determined by a dynamic method at 150-180oC		
the pressure drop across the filter for 5h, kPa, not above		10
deposits on the heater, points not more	-	2
The interaction with water, points no more than		
-status of the interface	1	1
-the state of the separate phases	1	1
Electrical conductivity, PSM/m		
without an anti-static additive at a temperature of 20oC, not more	10	10
White antistatic additive (at a temperature of refueling aircraft)	50-600	50-600
Saturated vapour pressure, hPa		
(mm of mercury, Calendar), not more	-	
The total content of water-soluble alkaline compounds		
	-	-
Thermal-oxidative stability at reference temperature below 260oC		
-the pressure drop across the filter, mmHg, CT, not more	25	25
-the color of the deposits on the tube, the points on the colour scale (in the absence of unusual deposits), not more	3	3

Further Recommendations and remarks:

1. Sample collected or loaded at point of pumping and analytical verifications.
2. Analysis is said to be true and standard confirming to International standards
3. Analysis and test performed where in full compliance with the relevant test method as of date.
4. This analysis report is subject to buyer's choice of approval or request for an independent organization to carry out another analysis report certification at buyer's cost.
